

KeyTrak Guardian

For Education

The Guardian Versatile SmartPanel (VSP) system provides a key and asset management solution for higher education and K-12 campuses desiring to hold staff accountable and protect students and staff.

Campus Facilities

- Secure and manage access to facilities such as administrative offices, research labs, physical plants, lecture halls, and classrooms.
- Secure physical keys, key fobs, or key cards.
- Manage keys for short-term maintenance or vendor use.
- Hold employees and staff accountable for facility access.
- Set up alerts to ensure keys are returned in a timely manner.

The VSP system shown with an expansion key panel with 40 key positions.

The VSP system shown with a 12-card module and 24-key micro drawer.

Student Housing

- Secure spare physical keys, key fobs, or key cards for campus dorm rooms or apartments.
- Manage access to other sensitive areas, such as maintenance closets.
- Provide maintenance workers and vendors a quick and secure way to access keys they need.
- Hold student workers accountable for the access they're trusted with.

Vehicle Fleets

- Track key use for campus vehicles such as maintenance vehicles, buses, and police and security patrol vehicles.
- Ensure employees aren't using vehicles they don't have permission or a license to use.
- Limit vehicle abuse by requiring mileage inputs when returning keys.
- Allow fleet managers to focus on other tasks rather than checking keys in and out.

Key and asset control play critical roles in the safety and security of a campus and its students and staff. The Guardian VSP's 100 percent accurate, verifiable, and real-time audit trail will provide you the peace of mind that comes from knowing your keys and assets are secure and accounted for at all times.
