Contact your trusted security reseller for more information.

Schools and Universities

Create a Better Learning Environment for Students, Faculty and Staff

When there is confidence in the security of an educational environment, students and staff can focus wholly on learning. Eagle Eye Networks makes it easy to strengthen security for every level of education, from kindergarten to high school to university. The Eagle Eye Cloud VMS simplifies video security management and provides a cost-effective scalable solution that lets you expand your security solution incrementally over time, so it's fit for one campus or an entire district.

Improve Campus Safety with Eagle Eye Cloud VMS

- Manage multiple cameras, locations and users from a single interface with centralized video management
- Scalability at a flexible price point with over 3,000 compatible cameras, including IP, analog and HD over Coax models
- Remote viewing of encrypted video for 100% mobile and web browser viewing that's fully secure
- Security that meets your budget with flexible monthly or yearly payment plans
- Improve emergency response time by providing designated first responders with realtime security camera access

Quickly Identify Suspicious Activity with Advanced Analytics

- **Object Counting:** Monitor the number of students and staff entering and exiting buildings.
- **Loitering:** Setup custom alerts for trespassers after hours in parking lots, playgrounds or football fields.
- **Intrusion:** Keep an eye on vulnerable areas after hours by setting parameters and tracking when someone or something enters the predetermined area.
- **Line Crossing:** Protect valuables like sound equipment, trophies or important documents with real-time alerts when someone enters a restricted area.
- **Camera Tampering:** Receive notifications when a camera is blocked, covered, or moved.
