

VuAlert

DISPLAY TIME • MESSAGES
EMERGENCY ALERTS

Features

- Portrait or landscape orientation
- Analog or digital clock display
- Digital display can be HH:MM or HH:MM:SS
- Customizable color schemes
- Promote school activities, athletics, clubs and more
- NOAA severe weather notifications
- Integrates with Telecor's eSeries and TII/XL systems
- Override screens with alarm notifications automatically

VuAlert displays emergency alerts, routine digital messages and synchronized time throughout your facility and across your district.

The 22-inch, high-definition screen delivers full color HD graphics and text that allow displays to be customized.

Individual messages are displayed on targeted screens, showing school activities, daily lunch menus, news, local weather information and more.

In locations such as common areas, auditoriums, cafeterias that demand larger displays, Telecor's display drivers can interface to any size LCD display, providing optimum viewing from any distance.

When integrated with Telecor's communication system, VuAlert will display critical messages instantly, informing occupants of the emergency and the action to take.

Sending information in a timely manner through as many channels as possible is the key to managing any emergency.
