## Private LTE for School Districts

Private LTE Networks helps School Districts stay connected on and off campus more easily than ever.

- **Security:** A Private LTE Network protects both students and staff, as well as your data from outsiders.
- **Speed & Reliability:** Improve Network Speeds for campus-related devices and and mitigate the risk of system interference or interruption.
- **Capacity:** Support the devices, data, and machines within your organization – All without wires and at a much lower cost of ownership.
- **Scalability:** Because your network is stronger, more reliable, and more secure, you can scale and expand your processes and operations.

**DID YOU KNOW?**

**10-15% of students within any given school district do not have internet access at home, yet over 90% of students are assigned online homework throughout the school year.**
