NAVIGATE
modern safety

Navigate360 Building safer tomorrows.
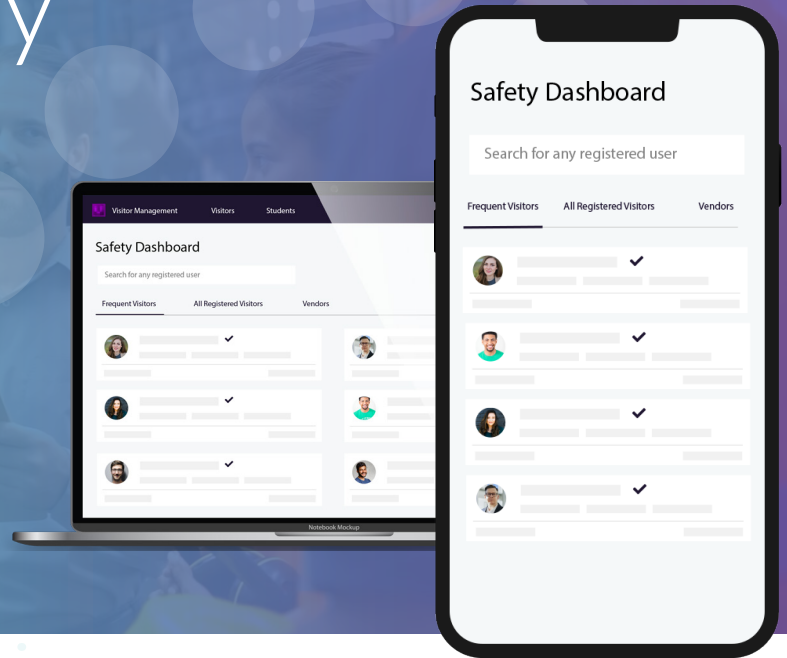

Navigate360 believes that together we can build a safer tomorrow — physically, socially and emotionally.

We provide comprehensive safety solutions that combine smart technology, education and professional services spanning the full spectrum of safety — from prevention to recovery.

Navigate360's solutions are used nationwide:

35,000+
school buildings

5,000
law enforcement agencies

4,400
businesses

1,425
healthcare facilities

900
government agencies

750
houses of worship

Resulting in:

18,900,000+
people prepared across all 50 states

Millions
of tips submitted most commonly reporting suicide threats, bullying/cyberbullying and drugs

2,100,000+
K12 students recorded with one-click accountability

"It doesn't do the work for me. Instead, it provides a framework that I can use to plan a safety and security roadmap for the entire school district."

Joe McKenna
Director of Safety & Security,
Comal Independent School District

"Anonymous tip reporting technology is a crucial component of Crime Stoppers USA. Our collaboration with Navigate360 [P3] yields a highly secure, yet user-friendly system for all our constituents."

Barb Bergin
Chairman of the Board
Crime Stoppers USA

NAVIGATE360 SOLUTIONS

Providing hundreds of years of collective experience in first response, emergency management and safety protocols.

Navigate360
Building safer tomorrows.

PREVENT PREPARE RESPOND RECOVER

Education

ALICE Training®

ALICE Training® is the first and most effective response to mass shooting gun violence. The training is implemented using a blended model, eLearning combined with hands-on training, to ensure learning retention as well as application of the ALICE strategies.

Comprehensive School Threat Assessment Guidelines (CSTAG) Training

This interactive, team-based training is designed to augment the benefits of our Behavioral Threat Assessment (BTA) technology by giving BTA team members the knowledge and skills they need to identify, assess and manage at-risk students throughout our nation's schools.

Safety & Wellness Suite (Workplaces and Schools)

Help ensure the wellbeing of your community by bringing awareness to stressors and the impact they can have on social and emotional safety.

Opioid and Addiction Awareness
Suicide Awareness and Prevention
Understanding Bullying (Schools Only)
Recovery: Trauma Response

Services

Interactive Site Mapping

The site mapping process results in interactive floor plans which provide first responders with critical details such as all life safety devices in the building, evacuation points and 360-degree images of all rooms and hallways.

Risk Assessments

Comprehensive risk assessments help you identify vulnerabilities, reduce risks and guide long-term safety planning, creating a solid foundation of security for your organization.

Vulnerability Assessments

A follow up to the Risk Assessment, the Vulnerability Assessment looks at the improvements made and reports on their effectiveness.

Technology

Anonymous Tip Reporting

Navigate360 offers two solutions — one for keeping schools and communities safe, and the other for communities to aid law enforcement and related agencies in solving crimes and managing intelligence information.

Behavioral Threat Assessment Manager

Modern technology provides teams with a simple user interface to manage and securely store threat assessment cases. Based on the most widely used behavioral threat assessment models, your teams are positioned for success.

Visitor Management

Know who is in your buildings at all times. This includes registering and screening every school visitor, volunteer, vendor and contractor so you know exactly who is entering the buildings, when they enter and exit, and what the reason for the visit is.

Emergency Management Suite

This suite of technology solutions offers a comprehensive approach to emergency preparation. The software guides users in partnering with law enforcement by sharing up-to-date, coded building plans.

Safety Plan Wizard

Create a building-by-building, state specific, FEMA-based school safety plan. The Safety Plan Wizard helps you make sure your building is compliant with legal requirements – and that your staff and students are protected

Student & Staff App-Based Rosters

Account for all students by name during drills and reunification from smart devices. Administrators can monitor student accountability in real-time and from anywhere.

Panic, Alerts & Notifications

Administrators can monitor student accountability in real-time within the Emergency Management Suite. Staff and administrators can send secure messages, and alarms may be initiated by any staff member if a specific student must be located immediately.

Drill Management

Drill testing empowers staff to respond effectively. More than 80 scenarios create the context for drills and outline specific responses that schools and employers can rely on in an emergency.

Reunification

Reunification is a critical protocol for any situation in which a building is rendered unsafe. This includes natural disasters, fires, chemical hazards and violent acts of any type. Our solution focuses on areas where technology can best assist the reunification process so you can establish procedures and protocols that best fit your unique needs.

Real-time Emergency Response Flipcharts

Real-time Emergency Response Flipcharts are emergency instructions easily accessible from an app. From a fire drill to a bomb threat, procedures are simple to access and follow.
