Navigate360

Comprehensive School Threat Assessment Guidelines Training

The most widely adopted behavioral threat assessment training for teams.

Ensure your team is trained and ready to recognize and help distressed students before their problems escalate into violence.

Improve School Climate

Improve Learning Environment

Improve Student Success

As a key component of school safety, CSTAG -trained threat assessment teams can help maintain a climate of safety, respect and support for students and staff.

- No racial disparities in disciplinary outcomes
- Decreased suspension rates
- Increased counseling
- Greater teacher safety
- Decreased bullying
- Behavioral threat assessment team alignment

86% of students receiving CSTAG assessments were able to return to their school.

Navigate 360 uses a blended approach to maximize learning and increase collaboration.

Navigate 360 is the leader in school safety using smart, intuitive technology. We are excited to offer this exclusive CSTAG Level 1 and Level 2 Training program to your behavioral threat assessment team.

Most Validated Threat Assessment Program

- Specific to school threat assessment team needs
- Delivered in collaboration with Dr. Dewey Cornell
- Blended learning delivery of the 9.5 hour program:
 - Level 1: 8-module eLearning courses
 - Level 2: Team workshop and virtual training

Improved School Environment

- Fewer than 1% of students receiving CSTAG team intervention are expelled
- Schools that adopted the CSTAG program report less bullying and greater teacher safety

Team Training and Alignment

- Team workshops to prepare for full implementation
- Strategic focus on a wide range of common cases
- Exercises to build team collaboration
- Direct application and use of the CSTAG model

Let's talk about how we can train your behavioral threat assessment team.
